Maintenance Manual for Hikvision 2 Series Camera

1. Please check whether the camera is working properly at regular interval.
2. Please check whether the wiring of the camera is loose, and whether the wiring is pulled or twisted.
3. Please check how the video is stored, in a SD card or in NVR, if it is stored in SD card, make sure the SD card works normally; if it is stored in NVR, make sure the camera keeps online on NVR.
4. Please regularly check whether the recording is normal, and confirm whether it is in the overwrite mode. If it is not in the overwrite recording mode, please change the storage device at a certain time according to your needs.
5. In order to prevent dust from being sucked into the camera body due to machine operation, static electricity and other factors, please regularly clean the dust exposed on the monitoring equipment to ensure the normal operation of the machine, and do not use harsh detergents or organic solvents to wipe the camera.
6. On a regular basis check whether the camera imaging is normal, whether there are abnormal purple images or other abnormal images. (The reason for these phenomena may be that the IR-CUT is damaged or the bubble is dirty and reflective)
7. Please make sure that the temperature and humidity of the environment where the camera is located are normal.
 - 1) The Storage Condition is -30 °C to 60 °C (-22 °F to 140 °F). Humidity 95% or less (non-condensing)
 - 2) The Startup and Operating Conditions is -30 °C to 60 °C (-22 °F to 140 °F). Humidity 95% or less (non-condensing)
8. Regularly check the camera mount for cracks.
9. Regularly check whether the hidden wire box is normal and whether the waterproof tape has fallen off.
10. Use only power supplies listed in the user manual or user instruction.
